

“Cleaning up the Environment One Room at a Time”

PerfectCLEAN[®] uses micro-denier fibers (3) that are so small they clean within the small crevices on any hard surface removing and trapping soil and contaminants. PerfectCLEAN absorbs more liquid than any other wiper – absorbing 8X's - whisking away large spills quickly. When dry, PerfectCLEAN has a strong natural (+) charge that attracts and holds dust and particles removing them from the environment. All PerfectCLEAN products are lint free. PerfectCLEAN can be used for most cleaning applications, including glass, chrome, stainless steel, Formica, marble, granite, spot cleaning carpets & upholstery, and just about anything else. PerfectCLEAN products are covered by multiple patents with the exclusive Built-in Antimicrobial Product Protection (EPA Registration # 42182-1 for the antimicrobial chemistry. Color coded wipers help eliminate the risk of room-to-room cross contamination.

Dusting Use: If the wiper is being used to remove light dust or dry particulate – use PerfectCLEAN without water.

Cleaning Use: If the wiper is being used to remove heavier soil, ingrained dirt, grease, or oils, use it lightly dampened with water or sanitizer. FOR BEST RESULTS USE DAMP **NOT** WET – just a little water will do the job!.

Care Instructions: Machine wash up to 190°F, Tumble Dry on the MEDIUM setting. **DO NOT USE FABRIC SOFTENER** (DOES NOT HARM THE PRODUCT BUT CAN SIGNIFICANTLY REDUCE PERFORMANCE - Wash Separately if possible. Use Bleach as required - according to the manufacturers directions.
