Dear Nigel,

It is with great pleasure to follow-up with you on the installation of the playground surface at our new school building, Fort Larned Elementary, here at USD 495 – Fort Larned, KS. This building contains grades preK-5 and serves approximately 400 students on a daily basis. In selecting the surface for the playground at the new building, sofSurfaces emerged as one that provided a quality product that was durable and possessed a contemporary design. The installation of the product was timely and professional, allowing our other construction projects to continue as scheduled. After installation and heavy usage of the area, I am pleased to report that our students are happy with the surface's functionality while I am happy that it provides the safety needed for our students.

Thank you again for all of your hard work and I look forward to potentially working with you again in the near future.

As always, if you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Sample", is written over the typed name and title.
