

SMD COSMETICS INTRODUCES THE FOUNTAIN OF YOUTH

BY KEVIN PORTER

The search for the fountain of youth may finally be over, and the result is healthy, great-looking skin. While millions are looking for effective anti-aging skin care products, many don't realize the power of natural herbal ingredients that are found in Korean skin care products.

SMD Cosmetics offers a premium line of award-winning, natural skin care products from South Korea. After 20 years, SMD Cosmetics has perfected their patented formulas. They use the most advanced natural skincare technology in combination with Asian herbal medicinal wisdom.

Not only is SMD Cosmetics one of Korea's most prestigious top-selling skin care lines, it is also the perfect blend of science and nature. Some of the ingredients for top products include Beer Yeast Extracts, Bear Berry Extract, Licorice Root, and Chinese Gogi Berries.

SMD Cosmetics was the first Korean skin care line to offer a non-toxic, herbal, medicinal-based line. Since launching in the United States, top celebrity make-up artists have discovered how powerful natural skin care can really be, and how using such products transforms the skin marvelously.

The Sarome Quintessential Snail Serum Concentrate is SMD's best seller and a perfect example of their talent of combining natural ingredients with science. Containing 62% pure snail filtrate extract, this cruelty-free product reduces wrinkles, dullness, sun damage, and acne scarring. It also deeply hydrates, reverses signs of aging, and even brightens the skin.

Other groundbreaking products have surfaced over the 20 years that SMD Cosmetics has been established. Some of the secret ancient herbal ingredients that help make their products so powerful include:

- Niacinamide helps improve skin's elasticity, dramatically enhances its barrier function, and helps minimize the appearance of discolorations.

- Barley malt-yeast extract contains essential amino acids, enhances smooth skin, improves moisture, and revives skin's healthy tone and texture.

- Fermented ingredients improve the skin's elasticity.

- Goji berries contain anti-aging properties.

- Wilfordii root extract offers antioxidant and anti-aging properties.

- Mulberry is an antioxidant that helps unclog pores, tones the skin, and adds moisture.

- Red ginseng extract has rejuvenating effects and can help restore the skin's moisture balance, signs of aging, and hyperpigmentation.

From every exclusive ingredient, the careful selection of the environmentally friendly glass bottles, to the top-fashion designers that helped craft the award-winning design and packaging, SMD Cosmetics overlooks no detail. Over 20 years of operation has brought them to the discovery that could be what people dream of when they think "fountain of youth."
