

"Push the single envelope"

Save 40%*

with our mail
consolidation service

Part of a portfolio of proven document
enhancement and delivery solutions
designed to drive documental efficiency.

Solution overview

XLPrint's mail consolidation service is a proven, self-funding solution to fill envelopes with multiple outgoing documents addressed to the same person and matched on a unique key. Customers immediately benefit from significant savings from reduced enveloping and postage costs.

Typically a local authority can realise a 25%* reduction in mailings with an initial merge of HB & CTR notifications. A typical housing organisation could realise a reduction of over 22%*.

XLPrint's mail consolidation service is a 2nd generation solution that can be deployed departmentally, regardless of back office solution. The solution is risk free and is the latest addition to the portfolio of market leading solutions offered by XLPrint to drive documental efficiency.

Key benefits

- Immediately save up to 40% - mailings vs account base*
- Self-funding - funded entirely through savings generated
- Back-office independent - any host system generated output
- Works in conjunction with digital channel migration projects
- Part of a portfolio of proven document enhancement and delivery solutions designed to drive documental efficiency

Who are XLPrint?

XLPrint Software has been helping improve the effectiveness and efficiency of both print and electronic communications since 1986.

XLPrint Software provides software and services for the efficient creation, enhancement, intelligent personalisation, consolidation, distribution and archive of all transactional and personalised marketing documents.

Join 1/3 of all UK local authorities who take control of all aspects of their document output processes with solutions from XLPrint.

Cost effectively deliver your documents, your way...

Want to find out more?
