

# Vocantas Employee Portal

## Online Employee Communications Manager

Vocantas solutions include an easy to use employee portal. Your employees will have a secure login (typically single sign on with your existing company login credentials) to check their shift offers, shift offer history and set contact preferences for how and when they wish to be contacted.

### The Benefits

Employees love the flexibility and mobility that the portal offers them and report that it provides a work life balance that improves their overall job satisfaction. The portal gives employees more visibility into available shifts, and they are able to accept more shift offers.

### How it Works

If an employee receives a text, call or email with a shift offer, they always have the option to log into their personal portal to bid on the shift. This gives them visibility to both a list and a calendar view of all shifts that have been offered to them through the automated shift call out solution, via voice, text, or email.

### Reports

Schedulers can run reports to see exactly how employees are using their portal - for example, showing when an employee made a change to their contact preferences and what their current notification settings are.

Employee ID	First Name	Last Name	Preferences History	Notification Options History
08881	Kevin	Greco	<a href="#">Preferences History</a>	<a href="#">Notification Options History</a>

### Mobile Friendly

The employee portal is mobile friendly and is optimized for use with any web browser on any type of device (smartphone, tablets, desktop, etc.). Give your employees the power of mobility and the pleasure of work life balance and flexibility by giving them control over how and when they communicate with you to accept shifts.

### The Hub

The employee portal is the hub that connects all Vocantas multi-modal communication modules: Auto Shift Callout, Absence Reporting and Emergency Broadcast.
