Product Test & Certification Laboratory

- FOUNDED IN 1992
- 25,000 SQ. FT. LAB
- ALL INDOOR FACILITY
- ISO17025 ACCREDITED

Our Capabilities Include:

UL/CSA & International Certifications (NRTL/C)

North American & International product certifications in our lab or yours. Most Electrical Product Categories covered including Medical, Laboratory, Industrial, ITE, Lighting, Appliances, HazLoc, and many more.

US/CAN Field Labeling

Custom Equipment, Prototypes, One of a Kind Equipment, Used Equipment, Small Batch Production Runs = some electrical equipment is not eligible for full certification, but can be Labeled in the Field to US and Canadian Standards.

Environmental & Performance Testing

Confirm product operating specifications, verify product operation under life cycle and extreme conditions, and determine product weaknesses to prevent warranty concerns. Accredited testing to meet all environmental test needs including: IP/NEMA ratings, shock, vibration, salt fog/spray, corrosion, aging tests, thermal & humidity cycling, HALT-HASS, dust tests, wet tests, tensile strength, gasket testing, mold stress, impact tests, etc.

CE Mark for Europe - All Directives

CertifiGroup can present comprehensive CE training for your staff and guide you through the process or, CertifiGroup can complete the entire CE process for you, providing all the required documentation and assisting with your TCF development. The fastest path to CE!

Lasers, LED, & UV Testing

Complete accredited test facility for CDRH, EN, and IEC requirements and report preparation to UL, FDA, EN, IEC, & ISO standards.

Toy Testing

New CPSC requirements for toys include mechanical testing, choke hazards, flammability and toxic materials in accordance with ASTM F963. For Europe, compliance with the Toy Directive and the EN71 series of standards is applicable. And most other countries also have toy certification requirements. CertifiGroup can do it all!

Plastics Testing

Complete plastics testing services to UL, EN, and IEC standards including flammability, glow wire, hot wire ignition, tracking resistance, tensile strength, cold impact, mold stress, etc. Bar sample and finished product testing capabilities.

HazLoc & SEMI Certifications

CertifiGroup has experts who can certify equipment used in Hazardous Locations for US, Canadian, and worldwide certifications, including UL, FM, ATEX and EN60079. All Divisions, Zones, & Classes. We can also certify equipment used in semiconductor production to SEMI standards S2, S8, & S10.

Industrial/Machinery Product Compliance

CertifiGroup can perform UL, CSA, CE, & International Certifications for all types of Industrial & Machinery Products: including Panel Shop Certification, Machinery Directive Compliance, and Alternative Energy products such as CNG, Hydrogen, Inverters & Combiners, Solar Farms, Wind & Water Turbines, etc.

Compliance Assistance

Experts in UL-CSA-IEC-EN Standards can help you make sure your products comply before UL and CSA submittal. You absolutely do not want to fail during your Certification evaluation. Let CertifiGroup help you be ready and compliant!

Compliance Design Training

Private courses for small or large groups, at your facility or in our Compliance Training Center. Only CertifiGroup teaches the requirements in the standards AND how to design for compliance, customized specifically for your products & standards. Hands-on! That is the only way to really learn and apply the material.
