There's little quite as exhilarating as taming that water crossing or reaching the top of that rocky peak. There's also nothing quite as embarrassing as your vehicle getting stuck half way — especially if it's in front of your mates or the rest of the 4WD club.

When it comes to making sure your 4WD has what it takes, quality parts are essential. One faulty component and your pride – and your pride and joy – can be washed away. That's why it's important you can trust the reliability of every component you put into your 4WD.

That includes quality filtration products. Fleetguard Filters provide best-in-class performance, going above and beyond OEM specifications to provide dependability and peace of mind.

Our superior warranty protection ensures peace of mind when you purchase a quality Fleetguard product. So when it's time to get off the leash, rely on 50 years of Fleetguard Filter manufacturing technology and expertise.
