

ASX Release
4 September 2017

Stargroup and DigitalX sign Joint Venture to develop Bitcoin ATMs

Stargroup Limited (“Stargroup”, ASX:STL) is pleased to announce it has signed a joint venture agreement with DigitalX Limited (“DigitalX”, ASX:DCC) to jointly tailor and offer a “Two-Way ATM” solution for buying and selling Bitcoin.

DigitalX is a Blockchain technology and advisory Company providing services to enable the launch of new financial products. DigitalX has leveraged Blockchain technology and the secure ledger system to create patent pending technology.

The joint venture agreement is for the entire global network of Stargroup ATM's with the initial roadmap to focus on Australia. At present, there are less than 20 ATMs in Australia that can facilitate a Bitcoin transaction and conversion fees are in the range of 4% to 8% of the transaction value¹. The vast majority of these ATM's are only “One-Way ATM's”; meaning users can only acquire Bitcoin and add it to their Bitcoin wallet via the ATM.

Stargroup provides end-to-end ATM deployment and electronic payment system services and solutions. Within Australia, Stargroup has deployed approximately 500 ATMs in Star Payments and manages approximately 2,400 ATMs via StarLink. Stargroup has a direct ownership interest in NeoICP Korea Inc, a private Korean company that manufactures ATMS, back office, coin counting, banking and casino settlement solutions. NeoICP Korea have approximately 16,000 ATMs and back office machines in South Korea bringing the total number of ATM's managed approaching 20,000.

The development of Two-Way ATM's means StarATMs will not only enable users to acquire Bitcoin but also to instantly convert their Bitcoin to AUD cash at the ATM. For current Bitcoin users looking to “cash out”, the process can often take a number of days using existing Australian online digital currency exchanges. Once implemented the Two-Way StarATM's are expected to solve a significant pain point for Bitcoin users.

The global Bitcoin market has grown from less than \$20 billion at the start of the year to over \$70 billion today. As seen through the growth in Australia's Bitcoin Exchange volume and Australia's internet search interest, Bitcoin has reached a level where a large-scale ATM roll-out provides a commercial opportunity.

Mr Todd Zani, Stargroup's CEO and Executive Chairman added *"Stargroup is pleased to partner with DigitalX on this project and leverage its unique ownership of its ATM manufacturer to develop a two-way ATM where a Bitcoin owner can not only buy Bitcoin but more importantly can cash their bitcoin out. This development may also be able to be applied to other cryptocurrencies and be distributed internationally."*

Mr Leigh Travers, DigitalX's CEO commented *"With our growing success in Blockchain consultancy services we view this opportunity as a suitable fit to offer ordinary Australians exposure to crypto currency and Blockchain security. The success of this Joint Venture with Stargroup will add long-term revenue channels to our business and additional value to our shareholders."*

About Stargroup

Financial technology company Stargroup Limited is the only ASX listed company deploying ATM machines in Australia and importantly, the only listed ATM company having a direct ownership interest in the manufacturer of its ATM technologies, namely NeolCP, a South Korean private company.

Stargroup Limited became the exclusive distributor of the cashPod ATM range including the recycler ATM, back office and payment technologies in Australia for the next 5 years on 7 August 2015. Stargroup Limited owns 11.28% of NeolCP Korea Inc, a South Korean private company that provides integrated and innovative self-service solutions to the banking and retail market.

Stargroup Limited, via its wholly owned subsidiary StarLink, became an ATM processing, switching and telecommunications business on 5 May 2017 and now has over 2,400 ATMs under management, processing approximately 16 million transactions a year.

Stargroup Limited, via its wholly owned subsidiaries, StarPOS and StarApps, is also an EFTPOS and payWave technologies provider and developer of the source code in its terminals via its 5-year distribution agreement with West International AB, a Swedish NASDAQ listed company, to distribute next generation EFTPOS payment terminals and solutions in Australian and New Zealand.

About Digital X

DigitalX is a Blockchain technology Company with offices in Perth and New York. Partners can use DigitalX's technology to offer new financial products.
